FEUCHTIGKEITSPACKUNG (MOISTURIZER PACK)

How to use: MOISTURIZER PACK is ideal for dry skin of all ages. After cleansing with DEEP CLEANSER or CLEANSING LOTION use the fingertips to apply the active moisturizer onto the face and neck. Let it work for 20 to 30 minutes, then remove with a wash cloth and rinse with warm water.

How it works: MOISTURIZER PACK invites moisture into the skin, making it smooth and soft. It should be applied twice a week in order to achieve a lasting effect.

KURPACKUNG (CURE PACK)

How to use: KURPACKUNG should be applied twice a week to thoroughly moisturize and smooth the outer layers of the skin. Finish with application of KURCREME HP, ALOE VERA BIO-AKTIV LIFT or BIO-ROYAL NANO.

How it works: Because of its particular consistency, KURPACKUNG quickly penetrates the skin, stimulates the skin cells and moisturizes while providing a protective barrier against harmful irritations. Even after the first treatment the upper layers of the skin are noticeably improved. This improvement is maintained by regular use of KURPACKUNG.

MASCA NEROLIA

- THIS TRANSPARENT GEL MASK DOES TWO THINGS TO YOU: IT PURIFIES AND SOFTENS YOUR SKIN

How to use: MASCA NEROLIA is a gel-mask with unique actions: it narrows enlarged pores, prevents the build-up of blackheads and removes clogged pores and dead skin cells on the surface of the skin. Apply evenly to the face and neck leaving on for 20-30 minutes. Remove with warm water and then apply cold compresses.

How it works: MASCA NEROLIA acts by gently peeling away surface layers of dead skin. The natural ingredients narrow the pores while the organic resistor "TN" frees dead cells. All skin types can be treated with no resulting irritation. An additional advantage to MASCA NEROLIA is that it stays moist sufficiently long so that its active

ingredients are able to take their effect throughout the entire period of application or massage.

REGENERATIONSPACKUNG

How to use: REGENERATION PACK should be applied to face and décolleté twice a week after cleansing with DEEPLANSER and HAMAMELIS LOTION: Leave on the skin for 20 - 30 minutes. Its effectiveness is increased by proceeding with warm herbal compresses. Remove the face mask with a tissue followed by first a warm and then a cold compress.

How to use: Depending on the size of the treated area, take an equivalent amount of dry powder into a small dish and mix it with either Hamamelis Lotion, Camphor Tonic, or Masca Nerolia until you get a slurry. Apply an even and thin layer with a brush and allow to dry. Remove with a warm cloth or carefully rub off the remaining mask. Hold a small skin area between two fingers of the left hand and use your right hand fingers to slowly rub off the mask. In this case you can use the mask as a herbal peeling.

How it works: contains dried and grained herbs as fennel, sage, rosemary, diatameous earth, and silica. It applies to oily and dry seborrheic skin, and acne. Herbal mask has a slight drying effect and ungreases the skin. Irritated and inflamed skin becomes stabilized.
